Introduction

Emoji Party is a collection with more than 120 3D emojis in FBX format, to be used in a Unity project. It also includes materials compatible Universal Render Pipeline, while it's possible to adopt materials for other render pipelines or other styles (such as different skin colors, etc.). Additionally it includes as well 2D sprites of the same emojis in frontal view.

Installing and usage

First of all, you must have installed the asset package "Emoji Party" from Unity Asset Store.

Once it's installed in your Unity project, go to folder "EmojiParty" in the project Assets and find folder "Prefabs", pick an emoji of your choice and drag and drop to your scene.

Emojis List

The list and codes follow the specs as published in [Unicode.org](https://unicode.org).

face-smiling
